- Check torque in main bolts of the bike.
- Visual safety inspection of critical components (frame/forks, tyres, rims, brakes).
- General check of major parts (gears, pedals, bearings, etc).
- Test ride.
- Free quote of any further work needed.

## MAIN SERVICE

We recommend this service in the following cases (but not limited to): \*

- As a 3-year service, if you use your bike just a few times a year, on that relaxed, sunny ride. (less than 500 miles a year)
- As annual service, if you use the bike quite often, in moderate weather conditions (between 500 and 2000 miles a year)
- As a 6-month service, if you use your bike extensively for commuting, long distances, vigorous riding and in harsh weather. (over 2000 miles a year).
- If your bike is not in the best shape and needs a service to put her in good working order again.
- If your bike is in average health and you want to make sure that everything is good before an important ride (race, touring holidays, charity rides, Eroica, etc).
- If you just bought a second hand bike that is working just average and want to put her in good health again prior to use.
- If you just rescued that dusty bike from the shed which has been sitting for years and want to put it in good working condition again.

\*Additional parts (if required) not included in the service.  
† Upgrade to stainless steel cables for £1 extra each.

\*Please let us know about your specific cycling condition or just bring your bike and we will advise of the best service for your needs
